

Determine Your Execution Tax

The silent structural cost that slows execution, reduces momentum, and blocks scale.

Execution Tax is the hidden productivity penalty caused by:

- Unclear processes
 - Rework
 - Delayed decisions
 - Firefighting
 - Inconsistent delivery
-

Rate Your Execution Tax

Instructions:
0 = Never | 5 = Always
(Higher score = more structural cost)

Category	Score (0–5)
Operational ambiguity	
Rework & corrections	
Firefighting cycles	
Delayed decisions	
Customer inconsistency	
Total	

Your Execution Tax Level

Total:  /25

0-8

Low Execution Tax - structure exists

9-15

Moderate - needs systemisation

16-20

High - damaging productivity

21-25

Critical - scaling will fail

Your 90-day Action Plan

1. Which inefficiency hurts you most?

2. What process/system must be created first?

3. Who owns the change? (Name the role, not the person)

Healthy execution isn't about effort.
It's about **engineered clarity**.

STRATISIAN

Strategy.
Structure.
Scale.
